Section 41

Periodic evaluation of researchers

Specific criteria according to grades:

CRCN:
- Regularity and quality of scientific production
- Participation in laboratory life

CRHC:
- Regularity and quality of scientific production
- Participation in laboratory life

DR2:
- Quality and originality of scientific production
- National and international influence
- Research Management
- Interest of the research programme
- Thematic opening
- Geographical mobility
- Quality of scientific development and knowledge translation activities
- Taking on of responsibilities

DR1:
- Quality and originality of scientific production
- National and international influence
- Research Management
- Interest of the research programme
- Thematic opening
- Geographical mobility
- Quality of scientific development and knowledge translation activities
- Taking on of responsibilities

Recruitment of researchers (eligibility phase)

Specific criteria according to grades:

CRCN:
- Regularity and Quality of scientific production
- Originality
- Independence
- Participation in scientific life

CRHC:
- Regularity and quality of scientific production
- Originality
- Independence
- Participation in scientific life

All criteria will be assessed with regards to experience
DR2:
- Quality and originality of scientific production
- National and international influence
- Ability to manage research
- Interest of the research programme
- Thematic opening
- Geographical mobility
- Quality of scientific development and knowledge translation activities
- Taking on of responsibilities

DR1:
- Quality and originality of scientific production
- National and international influence
- Research Direction
- Interest of the research programme
- Thematic opening
- Geographical mobility
- Quality of scientific development and knowledge translation activities
- Taking on of responsibilities

Grade promotion

Specific criteria according to grades:

CRHC:
- Regularity and quality of scientific production
- Participation in the laboratory's scientific life
- Independence

DR1 and DRCE:
- Quality and originality of scientific production
- National and international influence
- Research Management
- Interest of the research programme
- Thematic opening
- Geographical mobility
- Quality of scientific development and knowledge translation activities
- Taking on of responsibilities
